- **AI Development:** LLM Agents, OpenAI API, MCP (Model Context Protocol), RAG Pipelines, Vector Databases, Model Integration (GPT-4, Claude, Gemini)

Work Experience

Back-End Developer – ITeck

Giza, Egypt | Feb 2021 – Mar 2022

- Developed a comprehensive POS and cashback system using Laravel.
- Built modules to manage loyalty points and linked multiple organizations to shared financial benefits.

Front-End Developer – iT Systimatic

Giza, Egypt | Jun 2022 – Sep 2022

- Created responsive UI using HTML, CSS, JavaScript, and Bootstrap.
- Worked on ERPNext, especially in the invoice and billing modules.

Full Stack Developer – i-SoftLand

California, USA (Remote) | 2022 – 2025

- **MomoToys – Multi-Vendor E-Commerce Platform**
  - Developed a multi-vendor online store with complex features: Gift printing system, multi-currency support, automatic tax calculation.
  - 9+ payment methods, vendor dashboards, and role-based admin control.
  - User-focused offers and shipping to any country.
  - GitHub: https://github.com/Ahmed225Z/momotoys
- **OCIF – Islamic Educational Platform**
  - Built an educational website for an Islamic organization in the U.S.
  - Features include: Livewire-based calendar for scheduling lectures, live online sessions, and a ticketing system for booking events.
  - Admin panel for managing religious and Quran learning content.
- **PharmaLab – Multi-Pharmacy Management System**
  - A comprehensive pharmacy management platform that supports multiple pharmacies with individual dashboards.
  - Features include: 7 payment methods, international shipping, inventory tracking, discount coupons, and medical instructions attached to each product.
  - Dedicated doctor section with tips, consultation monetization, and admin document approval verification.
- **Med-Supply – Pharmaceutical Trade Management System**
  - Created a full system to manage pharmaceutical sales and vendor evaluation.
  - Features included: Buyer identification based on purchase volume, loyalty and ranking system, and custom forms for wholesale vs. retail.
  - GitHub: https://github.com/Ahmed225Z/medsupply

Full Stack Developer – Xtreme Digital

Egypt | Nov 2025 – Present

- **EasyDeal Real Estate Platform**
  - Developed and enhanced a comprehensive real estate platform connecting brokers, developers, and clients with custom features utilizing **Laravel** for the backend and **Angular** for the frontend.
  - **Google Maps API Integration:** Implemented precise sub-area mapping with interactive geographical boundaries to enable advanced real estate filtration and boundary management.
  - **Real-Time Chat & Communication System:** Architected a WebSocket-based

real-time chat with online status indicators, read receipts, and archive logs for smooth user communication.

- **Hierarchical Account & Permission Management:** Developed a role-based sub-account infrastructure allowing main agencies to create broker profiles with fine-grained access control.
- **Subscription & Broker Package System:** Integrated tailored operational tier structures with Stripe/Google Pay payment options to scale broker usage quotas dynamically.
- **OTP & Security Integrations:** Configured secure SMS OTP gateways utilizing SmsMisr and resolved core sender token deployment mismatches.
- **Comprehensive Archiving & Storage:** Built reliable storage and automated system logs for historical listings, file attachments, and media preservation.
